### About Provider's Choice

Provider's Choice is a California corporation that manufactures an extraordinary line of the highest quality full line incontinence products available in the market today. We began our business with hard work, good business ethics, and the goal to build the best incontinent line of products the industry has to offer. With these goals in mind, we strategically designed and perfected a line of incontinent products that provide extreme comfort, superior absorbency and maximum retention capacities. Our products are all designed to neutralize the PH levels in urine to restrict the growth of bacteria, creating a safer skin environment while keeping individuals dry, comfortable and protected. .

### Provider's Choice Active Ultra Plus Brief

Our Active Ultra Plus brief has exceeded all industry expectations and are superior to the top-of-the-line briefs made by Abena, Molicare, Tena and Eurobrief. Active UltraPlus briefs provide an extended wear time that alleviates the nuances real users have expressed with the leading diapers in the marketplace, including the elimination of embarrassing crinkling noises when walking, leakage on clothing and furniture, and harmful chaffing on the skin. Tested, approved, and exceeding all expectations by real brief users, Provider's Choice Active Ultra Plus briefs will out-perform any brief on the market today. With our quality, absorbency, reliability, and comfort, Active Ultra Plus briefs will assist individuals to enjoy the active lifestyle they deserve,

## FEATURES

Latex free

Cloth-like comfortable waistbands

Strongest waterproof outer layer

Highest absorbency in inner core

Elastic leg cuffs and strong leak guards

Engineered to minimize crinkling and embarrassing noises

Eliminates fluid leakages that excrete unpleasant odors

Wetness indicator displays when it's time to change

Strong hold, tear-resistant re-fastenable Velcro tabs

All white diaper with no large markings for discrete wear underneath clothing

True 12 Hour diapers allows all day or overnight usage without changing

### Absorbency

The Active Ultra Plus brief has the highest absorbency of any diaper available in the marketplace today! The super-absorbent polymer which Active incorporates in its revolutionary products, absorb and neutralize large voids of urine while preventing leakage which is the major problem with the products of today. The Active Ultra Plus brief's high quality and efficiency offers more flexibility in a quality lifestyle due to its ability to absorb up to 4 times more fluid than that of other quality products in the marketplace today. This advantage means fewer changes, less waste, and a lot less time out of a quality life.

### Application

The re-fastenable Velcro tabs on the Active Ultra Plus brief, is one of the products best attributes. Unlike other briefs available, our Velcro fastening system sticks firmly and can be removed with reseal-ability ensuring that you can repeatedly open and close the brief many times without tearing, while keeping the strong bond with each fastening. The Velcro tabs apply and remove quietly and eliminate the crinkly noises and tears associated with briefs that use adhesive tapes in the marketplace today.

### Comfort & Safety

Active Ultra Plus briefs polymer encapsulation system traps and neutralizes the PH levels in the urine, while keeping you dry and clean. This high performance brief is designed to wick urine from the skin while capturing large volumes of urine and turning it into gel, the results is dryer, healthier skin, which virtually eliminates odors, chaffing, rashes and associated infections.

### Appearance

The Active Ultra Plus brief uses all white materials, making the product very discrete while wearing under clothing. Because the absorbent actions or the Active Ultra Plus brief captures and disperses fluids so well, the diaper never bulks up or sags down when soiled.

### Noise

The outer cloth-like backing on the Active Ultra Plus brief is the quietest among its competitors. Our briefs eliminate the crinkly noises associated with movement. The quiet Velcro fasteners on the diaper allow for discrete changing at any time and in any location.

### Price

Active Ultra Plus briefs are more economical than most briefs in the medical marketplace. They provide a significant bottom line cost savings as it relates to daily changes and skin quality. This product is built for longer-lasting usage and for complete 8-12 hour or overnight protection. Due to the absorption qualities of this product these diapers can be worn up to 4 times longer than a traditional diaper. This results in fewer changes while the environmental waste impact is minimized.

### Improved Quality of Life

Provider's Choice Active Ultra Plus brief has the highest absorbency and leakage protection of any brief available in the marketplace today. This allows brief users to change much less often and enjoy the day to day activities of a normal life with dignity without the worry of leakage and changing so frequently. The Active Plus brief allows for an uninterrupted nights sleep with maximum comfort, skin integrity, while reducing the environmental footprint.

### Environmentally Friendly

About two decades ago, adult disposable diapers accounted for less than 1% of the nation's landfill. By comparison, baby diapers—a much smaller product with a much larger market share—totaled 2% of landfill. Today, those numbers are quite different: adult disposable diapers comprise nearly 7% of the nation's landfill while baby diapers are down in the 2-3% range. These numbers are incredibly significant. In a nation of more than 300 million people, with millions of tons of waste products being thrown out each day, nearly 10% of all trash is made up of soiled disposable diapers. The Active Ultra Plus diaper allows the use of 3-4X less diapers which helps in reducing waste in our landfills and thus is a more environmental alternative.
